Professional Summary

Software developer with technical training in software analysis and development. Hands-on experience in frontend development using React.js and Tailwind, scripting with PowerShell, and infrastructure support on Azure. Passionate about solving technical problems, automating processes, and building intuitive user interfaces.

Professional Experience

ETB — Software Developer   **Bogotá, Colombia · July 2024 – January 2025**

- Resolved technical issues in virtual machines and systems, ensuring availability and performance.
- Developed PowerShell scripts to automate performance reports for systems and VMs, reducing errors and improving efficiency by 80%.
- Managed Excel data reports using advanced formulas and filters to support strategic decision-making.
- Supported the IT team in infrastructure maintenance and ensured system integrity.

Project Highlights

- **Martínez Iure:** Legal website for showcasing legal services → Visit site
- **Infinicode:** Internal messaging app built with React and Tailwind→Try it

Technical Skills

Programming Languages: JavaScript (Advanced), Python (Intermediate), Java (Basic), PHP (Basic), foundational knowledge in OOP
Frontend: React JS (80%), Tailwind CSS (90%), JavaScript (80%), Vite (90%), HTML5 (90%), CSS3 (90%)
Backend: Node.js (60%)
Cloud & Automation: Azure (70%), Hyper-V (70%), PowerShell (80%), task automation and report generation
Databases: Microsoft Access (80%), MariaDB, MongoDB, SQL (Intermediate)
UX/UI: UX design (90%), Figma (Intermediate), wireframing and prototyping
Networking & Security: Basic Cisco networking, network protocols, cybersecurity fundamentals
Artificial Intelligence: Prompt engineering (Intermediate), use of ChatGPT, Copilot, and AI assistants, task automation with generative AI
Productivity Tools & Methodologies: Microsoft 365, Notion, Power BI, Git/GitHub, basic knowledge of Scrum
Blockchain: Basic knowledge (60%)

Languages

Spanish: Native
English: Intermediate **(B1)**
