Professional Summary

Software Developer with a technical degree in Software Analysis and Development from SENA. Strong background in frontend development using React.js, JavaScript, TailwindCSS, and Vite. Experience in PowerShell scripting, Azure, Hyper-V, and object-oriented programming with Python. Knowledgeable in network fundamentals (Cisco), UX design, and data visualization. Recognized for being proactive, responsible, a fast learner, and effective in dynamic environments.

Professional Experience

ETB — Software Developer   **Bogotá, Colombia · July 2024 – January 2025**

- Resolved technical issues in virtual machines and systems, ensuring availability and performance.
- Developed PowerShell scripts to automate system and VM performance reporting, reducing errors and improving efficiency.
- Managed Excel-based data reports using advanced formulas and filters for key decision-making.
- Assisted IT operations in maintaining infrastructure uptime and system integrity.
